Free Report – Super Fast Lists

This report gives a brief introduction to some methods you can use to build a list on the Internet quickly and easily, even if you currently have no subscribers at all.

Method 1: Sign up at the Warrior Forum

If you are serious about progressing your internet marketing at all, you absolutely must sign up here. The contacts you can make, the information you can get absolutely make it worth its weight in gold.

If you sign up for full membership you also get access to 'The War Room' where you will get even more great information and help in making your way forward in internet marketing.

But how does this help get you subscribers? Well, there are 2 main things you need to 2 at this stage to start getting subscribers.

1. Have a signature block set up with a link to one of your squeeze pages with a captivating headline to get people to click. Post in the forum and your link will get visibility and you will get some subscribers

2. Put up a specific post in the War Room offering your report out for free to all War Room members. Note you aren't allowed to force people to opt in when you offer War Room gifts, so you just have to make it as compelling as possible. Something like this works:

You're not forcing them to subscribe, as the backdoor link is there, but plenty of people will put their details in out of force of habit.

Method 2: Adswaps

There are a number of places online where you can sign up and find people who will do Adswaps with you. You can also find adswap partners in the JV section of the Warrior Forum. Once you have built up your list to say 100 or 200 subscribers, you will be able to start doing adswaps.

Essentially what is involved is you agree with someone that you will send an advert to their offer in exchange for them sending your offer out to their subscribers. Agree a time and a date to send your adverts out.

Make sure you use tracking software that allows you to work out where your traffic has come from so you can work out if the swap has been successful or not. One simple way to measure results is to set up a unique squeeze page and a unique capture form inside AWeber for each swap you do. The AWeber form will show you the clicks and subscribers that have gone through that form and allow you to easily identify whether or not you got a 'fair swap'.

Remember that by doing this you will build up your list in the same way that compound interest works - say you start with 100 subscribers and you can add 10% for each swap you do, it's a lot less than 10 swaps before you get to 200 (100, 110, 121, 133, 146, 161, 177, 194, 214) - just 8 swaps takes you well over double what you start with. With a good squeeze page and a responsive list swap partner you could get 20 or 30% without too much difficulty.

Method 3: Sign up for Giveaway events

Giveaway events are online events where you can sign up, upload your product details and attract people to your site to sign up on your squeeze page. Search google for online giveaway events and get signed up to some. I've recently been

involved in some giveaway events. To be honest, it's not the biggest source of leads on this list, but it still got me some traffic and new customers.

If you sign up as a premium member / promotional member or whatever the particular giveaway calls it, you will be able to upload a product to sell (generally this has to be your own product, not PLR items). When I have done this I've got extra subscribers and sales, and the listing has always more than paid for itself.

Summary

Building a list is actually relatively simple once you get going and understand what it is you need to be doing. Once you have a list you can market to, you can make a lot of money by sending out offers to products you create or to affiliate links to other people's products.
